Talking: Use the names of the planets, including Planet Earth, when talking about the Solar System. It is important for children to hear the correct science vocabulary.

Math: When talking about the phases of the moon, it is a great opportunity to talk about and explore fractions with quarter, half, and full (whole) moon. Use the fractions with favorite food, such as pizza, a pie or cake, or even splitting a snack in half. Using the terms will bring about understanding of these concepts.

Phonological Awareness:

There are many songs and nursery rhymes that use the moon, stars, or the sun in the lyrics. Clap, chant and/or sing them to hear the syllables and rhythm in the words. Here are a few ideas: "Twinkle, Twinkle Little Star," "You Are My Sunshine," "Hey Diddle Diddle," "I See the Moon," "Rocket Man" and many more!
